**One carrier, two borders: a new
solution for greater efficiency**

Organization

Frontier Distribution Services, Inc.

Industry

Freight

Location

Kitchener, Ontario

Operations

- 25 commercial trucks and trailers

Website

frontierdistribution.ca

Solution

- Zonar Coach™
- Samsung Galaxy Tab Active2
- Zonar Logs™
- Zonar FaultIQ®
- Zonar V4™
- Zonar Ground Traffic Control®

Benefits

- Faster fault code decoding
- More vehicle uptime
- Informed maintenance decisions
- Streamlined repairs and maintenance
- Enhanced fleet efficiency
- Compliance with U.S. ELD mandates
- Precise HoS reporting
- Reduced driver downtime
- Safer driving
- Driver exoneration

Frontier Distribution Services Inc. is a truckload and less-than-truckload (LTL) carrier that provides service to and from the U.S. and Canada. Headquartered in Kitchener, Ontario, the company's fleet of 25 commercial trucks and trailers is perfectly positioned for easy access to the Greater Toronto Area, as well as the Buffalo, Detroit and Port Huron border crossings in New York and Michigan, respectively.

Founded in 1998, Frontier has earned its reputation for quality services. Above all, Frontier strives to exceed customers' expectations. With so much riding on its fleet, Frontier was looking to operate as efficiently as possible.

Specifically, Frontier needed:

- real-time, detailed vehicle data for greater fleet visibility
- easy compliance with U.S. and Canadian ELD mandates for seamless border crossing
- easier remote diagnostics and fault decoding for greater vehicle uptime

Frontier chose Zonar, whose smart fleet management solutions provide timely, actionable vehicle data through a [single, secure online portal](#). Plus, our predictive maintenance platform enables easier remote vehicle diagnostics across all makes and models.

To tick off the final checkbox on Frontier's wish list, [Zonar Logs](#) even meets the standards for U.S. ELD mandates.

More uptime through a mixed-fleet vehicle health platform

The longer it takes to decode an issue, the longer the downtime if that issue sidelines the vehicle. "To put a dollar value to it, downtime is extremely costly," Jonathan Neeb, vice president, Frontier Distribution Services, Inc. "Especially downtime that follows a towing incident."

Standard virtual checks didn't provide all of the information necessary to make informed decisions. No real context, no up-to-date status. Once a code was prompted, fleet operations had to determine what

the code was, evaluate its level of severity and provide the driver with a recommendation. Decisions were often made based on vague, general information—until Frontier implemented [Zonar FaultIQ, powered by Noregon](#), across its entire fleet.

FaultIQ is a single, online predictive maintenance platform for monitoring detailed fleet health, including each vehicle's health and safety score. FaultIQ is mixed-fleet friendly, so you can monitor all makes and models across your fleet on one dashboard.

FaultIQ also decodes faults into understandable language and provides recommended action plans. Now, Frontier's fleet managers use the detailed insights, patterns and data FaultIQ provides to:

- make more informed decisions, faster
- streamline their approach to maintenance checks and repairs
- identify reoccurring issues and faults, such as emissions
- determine the need for routinely scheduled maintenance or inclusion in regularly scheduled preventative maintenance checks
- catch and eliminate issues to prevent roadside breakdowns, pricey tows, repairs and driver downtime

Pre-trip maintenance checks are now either taken care of before the truck leaves the shop, or handled on the road at a scheduled date and time.

Handling the unpredictable

Some issues can't be predicted, and that makes the live-view look into the fleet critical. Frontier's fleet operations recently identified the precursor to a starter going out on one of the vehicles. Typically, drivers won't know about this fault. They would have been stopped mid-route, resulting in an expensive tow, critical engine damage and unnecessary extensive repairs.

Instead, Frontier's fleet operations formed an immediate plan, and sent the truck straight for repair.

with the U.S. ELD mandate

Although based in Canada, Frontier adopted ELD technology before the Canadian ELD mandate was issued. Today, Zonar Logs ensures compliance and saves drivers time thanks to the accuracy of the new digital reporting.

Before Zonar Logs: Drivers rounded to the nearest 15-minute mark.

With Zonar Logs: Drivers save 7 to 8 minutes per stop because the new report tracks to the exact minute.

With an average of 10 stops, these savings add up to one hour of additional drivetime per day. More time on the road means more money made. And more exact reporting means fewer compliance violations.

Making compliance easy for drivers

After deploying [Zonar-enabled driver tablets](#), loaded with Zonar Logs, Frontier's drivers have noted how easy compliance now is.

They can now rely on the tablets to keep them up to date with U.S. HoS regulations. And, Zonar Logs regularly provides drivers with the status through their tablets.

Coaching and exonerating drivers

Frontier also implemented [Zonar Coach](#), a video-based, in-cab driver coaching solution that improves commercial vehicle safety, efficiency and compliance. Fleet managers use Coach to identify risky driving behaviors and coach drivers to be safer. In doing so, the company's drivers now operate more safely and have greatly improved safety ratings. Fleet managers can also exonerate their drivers and reduce the number of faulty violations by pulling Coach's video clips to help clear their drivers from being wrongly accused as the cause for incidents.

According to Neeb, "We've been able to use Zonar technology to achieve increased efficiency, reduced repair costs, and lessen downtime for our drivers on the road."

About Zonar

Zonar exists because you deserve better. Student transportation fleets trust us to protect our nation's children every day. Now, we're the trusted leader and clear choice for small to mid-sized businesses, enterprise fleets, and public sector organizations across the Americas. To some, you're one of a million. To us, you're the one in a million. Our proven fleet management solutions help you run better, safer and more efficiently. We help you save more of everything. We work late, push harder and deliver what's needed, faster—for you.

You might not get fired for choosing someone bigger or shinier. But when there's a surprise, you'll want the one who picks up and shows up to help. You call? We answer, 24/7. Whatever size, mix or industry your fleet is, we move at your speed to help solve real-world problems.

Zonar HQ: Seattle, WA. Other locations: Cincinnati, OH, West Chicago, IL & Lakeland, FL. Top priority: You.
