BUSPATROL

Correct driver behavior

Modernize buses with new tech

Integrate safety and efficiency

Prevent future violations

Safeguard your entire fleet. No cost.

Violators fund BusPatrol and Zonar technology, not you.

Illegally passing a deployed stop-arm puts student riders at risk. And yet, millions of drivers do so every year. To address this growing problem, BusPatrol and Zonar® have partnered to offer an exclusive, comprehensive bus safety technology package. Participating districts pay zero upfront capital cost, operating costs or management costs. The program is violator funded entirely through stop-arm enforcement.

A full suite for your full fleet.
Safeguard student riders, and modernize your fleet with a comprehensive suite of modern bus fleet management solutions.

BusPatrol handles every aspect of its seamless stop-arm enforcement program, including equipment, maintenance, evidence, law enforcement coordination, collections and support. Violators are held accountable. Students are safer.

Safer buses mean safer riders. In addition to BusPatrol's AI-powered cloud-connected bus safety tech, Zonar smart fleet management technology delivers greater fleet efficiency, ruggedized driver tablets, electronically verified inspection reporting and advanced diagnostics. Also at no cost to you.

Key features

- Automated stop-arm cameras and technology
- Fully managed stop-arm enforcement program
- Up to 4 interior, cloud-connected safety cameras
- Ruggedized, secure driver tablets
- Electronically verified inspection reporting
- Standardized sanitization protocols
- Real-time fleet tracking
- Full-fleet deployment
- Choice of smart fleet management package

Choose the fleet management package that fits.

In addition to the all-inclusive BusPatrol stop-arm enforcement program, you have the choice between two Zonar smart fleet management packages—still at zero cost to you.

Zonar product/service	Description	SafeTech Student	SafeTech Complete

Advanced Diagnostics	OEM remote diagnostic services with continuous monitoring and diagnosis of fault codes for Detroit™ Diesel engines. Includes clear, actionable recommendations that are immediately sent to operations managers.		✓

Premium Upgrades

EVIR® Mobile
Ensure inspections with our standalone EVIR® application. Verify the pre- and post-trip inspection process, while eliminating paper reports. Available on Android and iOS devices.

Zonar Access™
Control costs with digital employee time and task management. More precise control over scheduling, payroll and routing.

Zonar Coach™
Protect your business with a dual-facing dashcam and driver application. View video evidence of incidents, real-time in-cab coaching and performance insights for fleet managers.

Zonar FaultIQ®
Prevent costly tows and downtime. FaultIQ reports fault descriptions and severity with plans for action.

Zonar Verify™ (for Transfinder and BusPlanner users)
Deploy this driver-facing mobile app for real-time verification of the right student, right bus, right stop.

Zonar MyView™ *
Mobile app for parents and school dispatcher portal for buses equipped with a Zonar V4 using proximity-based location data.

Zonar MyView™ Ridership
Requires Z Pass RFID card reader. Parents receive notifications for where and when their child gets on or off the school bus. Does not require Z Pass service fee.

Zonar Z Pass®
Provide parents and management insight into when and where student riders get on and off the bus.

Navistar OnCommand® Connection
Link an entire fleet with one portal—all makes, all models—to streamline operations from fleet health alerts to ordering parts and arranging service.

Third-party apps
Expand drivers' capabilities by loading their Samsung Galaxy Tab Active3 tablets with Certified Google Play apps, which have been vetted and proven compatible.

Is our offer available in your area?

This comprehensive bus safety technology package features a stop-arm enforcement program that uses automated stop-arm cameras, which require state-approved legislation. For now, this offer is available in select U.S. states with supporting laws. **Learn more**.

* Requires Rapid Logging.
