

| Zonar DashCam™ (forward-facing)

Meet your eyes and ears on the road.

Protect everyone on the road by strengthening your fleet's culture of safety.

Install AI-powered Zonar DashCam™ forward-facing devices in your vehicles to detect, capture and upload footage of specific safety events to the secure online Zonar Coach™ dashboard. View HD DashCam™ footage on demand, anytime.

Exonerate drivers faster, lower insurance premiums and reduce legal expenses through quicker investigations. Coach drivers with objective video evidence of specific habits and risky behaviors.

If you choose, configure the DashCam to alert drivers in real time—helping them self-correct in the moment, before an incident occurs.
