

External Camera

Meet your eyewitness—with more angles.

Cameras record what people won't share. The more perspectives you capture, the better equipped you are to protect against fraudulent claims, false accusations, theft, unnecessary legal fees and rising insurance costs.

Equip your vehicles with an external Zonar DashCam™ to capture what happens beyond the internal DashCam's view. More angles mean more objective evidence to understand—and prove—what really happened.

- Help investigate stolen equipment from a jobsite or yard.
- Detect damage that occurs at loading docks, in yards or in parking lots.
- Monitor plowing, sweeping, striping and other contracted services.
- Capture evidence of unsafe and at-fault passing vehicles near bus stops or jobsites.
- Validate on-time waste bin pick-up or deployment.

When a vehicle is involved in an accident, prevent legal claims, costs, and fees from spiraling out of control. Use

the footage to clear falsely accused drivers and protect your business from nuclear verdicts.

Take in the full context with one view.

Each DashCam stores up to 70 hours of high-definition driving footage, all easily accessible through the Zonar Ignition™ platform.

Play every camera angle together in one synchronized view to see the full story. Review the trip timeline, pinpoint when and where the event occurred, and download footage within minutes.

Key features

- Captures HD footage of vehicle side & rear
- Compatible with other Zonar Dashcam devices
- One view of all camera angles together
- Single dashboard access to all footage
- Downloadable, on-demand footage
- USB connectivity to Zonar DashCam devices
- Easy self-install in minutes
- Stores up to 70 hrs. of driving time HD footage
