Professional Services | Custom Reporting

Drive success with custom innovation.

You need it, let's build it.

Vehicle health, performance, utilization, location tracking, safety and compliance—you name it and there's a report for it. Instead of spending time analyzing, exporting and building reports on your own, work with Zonar experts to create custom data visualizations delivered in Microsoft® PowerBI to fit your exact needs.

Tailor reports to fit your fleet.

Commercial fleets aren't simple—especially with evolving tech and integrations. Off-the-shelf reports paint a picture, but not the whole one. You need more detail. Customized reports match your operation's requirements, challenges and goals. More visibility into your fleet's inner workings means more ways to operate at your best.

- From-scratch reports for unique analytics
- Combined existing Zonar Ignition® reports

Turn data into your edge.

Analyze the data collected by Zonar technology and preferred internal software. Make more strategic decisions that set you apart from the competition.

- Analyze multiple key metrics on one dashboard.
- Identify opportunities to reduce operating costs, inform purchasing decisions and improve operational efficiency..
- Inform fleet management strategies, maintenance schedules and driver training programs.

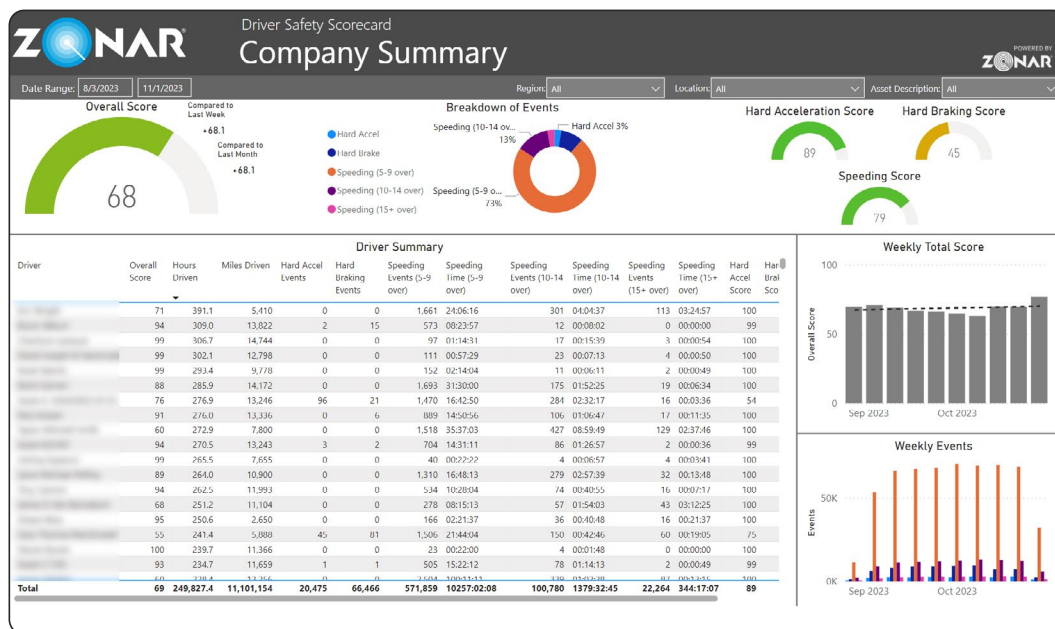

Focus on the data that matters most to move smarter.

- Fuel efficiency
- Inspection performance
- DOT compliance
- Asset utilization
- Driver productivity & safety
- Vehicle health & maintenance

Key features

- Expert help creating custom reports tailored to your fleet
- New reports built from scratch
- Combine existing reports in Zonar Ignition®
- Delivered in Microsoft® PowerBI
- Higher ROI on your technology investment
- One-stop-shop report to advance company initiatives
