

Time is money. Save both.

Relying on drivers to manage time in and out makes the labor portion of your budget a moving target. And the difference can be thousands of dollars each year. The right process makes all the difference.

One driver. Two processes.

Start time is 6:05 a.m. | High School and Middle School 6:15–7:30 a.m. | Elementary School 7:35–9:25 a.m.

Enters time manually

- 05:47** Clocks in.
Finds assigned route.
Walks to bus.
- 06:10** Powers on bus.
Begins pre-trip inspection.
- 06:22** Leaves yard.
- 07:38** Completes first route.
- 07:41** Starts elementary route.
- 09:31** Completes second route.
Leaves yard.
- 09:38** Returns to yard.
Begins post-trip inspection.
- 09:45** Completes inspection.
- 10:02** Walks back to office.
Clocks out.

Total time spent and paid for

04:15

Uses Zonar Access™

- 06:00** Arrives at bus. Powers on vehicle and Zonar-enabled tablet. In-cab log-in is set for 6:03 a.m. No early sign-on.
- 06:03** Clocks in.
Begins pre-trip inspection.
- 06:13** Leaves yard.
- 07:28** Completes first route.
- 07:34** Starts elementary route.
- 09:24** Completes second route.
Leaves yard.
- 09:31** Returns to yard.
Begins post-trip inspection.
- 09:45** Completes inspection.
Clocks out in the bus using Zonar-enabled tablet.

Total time spent and paid for

03:45

**Using Access saves you 30 minutes per driver.
Now do the math for your whole fleet.**

30 min x \$16 hourly wage = **\$8** a day per driver
\$8 x 50 drivers = **\$400** lost each day
\$400 x 180 school days a year = **\$72,000** lost a year

What made the difference.

Without Access

Dispatch has no control over when drivers clock-in, clock-out or perform inspections. Distractions and conversations happen along the way. Drivers might clock-in early and clock-out late—without realizing the impact on the budget.

With Access

Dispatcher customizes driver tasks into the schedule and dispatch portal before the driver clocks in.

- Allocates 10 minutes for pre-trip inspection.
- Allocates 2 minutes for early clock-in.

Driver uses Zonar-enabled tablet located in the bus to clock-in and out of tasks.

Watch your savings add up.

Use Zonar Access, the digital task and time management solution, to see where your labor budget goes. Manage when employees can clock in and out to streamline payroll processes. Labor is your fleet's top cost. Upgrading to modern timeclocks saves money.
