Ditat

Manage
logistics, loads and deliveries

Ensure
inspections are done right

Integrate
TMS and Zonar tablets

Make
drivers' lives easier

Use one solution to manage your fleet and transportation operations.

Use two essential solutions, one user experience.

Drivers and operators need technology to make life easier, not harder. Through the Zonar and Ditat partnership, fleets can manage logistics, as well as load and delivery, with one integrated experience on Zonar's tablet and Ditat's interface.

Put driver-facing TMS, HoS and EVIR into drivers' hands.

Receive offers and manage load deliveries using Ditat's Mobile Dispatch on the Zonar tablet. Speed up invoicing and payment by scanning documents using the Ditat app through the Zonar tablet, so they're automatically converted to PDF and uploaded into the shipment document management system. Pair Ditat's driver-facing TMS with Zonar Logs™ to capture hours of service and availability. With the two-solution integration, help dispatchers find available resources and make offers through Ditat's interface.

Add Zonar's patented Electronic Verified Inspection Reporting (EVIR®) app to your solution, and ensure pre- and post-trip inspections are done properly every time—including trailer inspections as needed.

Key features

- Fully integrates HoS and tracking
- Clear, easy-to-access load offering
- Adds trailers to inspections as needed
- Two-way messaging between Ditat's TMS and Zonar's tablet
- Automated geofence arrival and departure
- Real-time GPS data with ETA calculation

ZONAR

Integrate data for fleet managers.

For Zonar and Ditat customers, both solutions come integrated on the Zonar tablet. Additional API integrations ensure data collected from vehicles, tablets and driver-facing apps—and sent through the Zonar V4™—are readily available in Ditat's interface to streamline time-critical operations onto one screen. Of course, fleet managers still use Zonar's secure web portal, Ground Traffic Control®, to view and analyze vehicle data and diagnostics.

About Zonar

Founded in 2001, Zonar has pioneered smart fleet management by providing innovative technology that has changed fleet operations in the vocational, passenger and commercial trucking industries. Headquartered in Seattle, Zonar is part of the Continental AG family, a global leader in automotive technology.

About Ditat

Founded in 2010 and located in Saint Louis, Missouri, Ditat designed a comprehensive and proven Transportation Management Software (TMS) to automate logistics while improving accountability and performance. Today, this high-quality system dispatches thousands of trucks.
