DOSSIER powered by AMCS

ZONAR | ALLIANCE PARTNER

Integrate inspections & maintenance

Reduce downtime, costs and parts

Automate work pending & repair notices

Minimize excess & obsolete parts inventory

Easier workflows make a fleet healthier.

Automate and optimize vehicle maintenance workflows.

Streamline your operations, bolster safety and compliance efforts, and extend the life of your vehicles through the Zonar-Dossier integration.
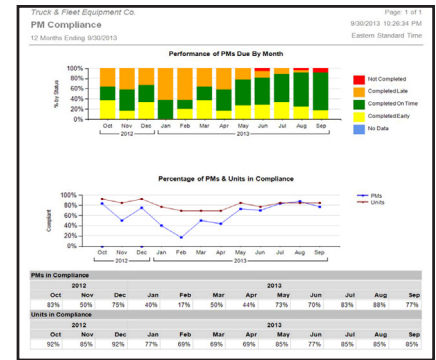

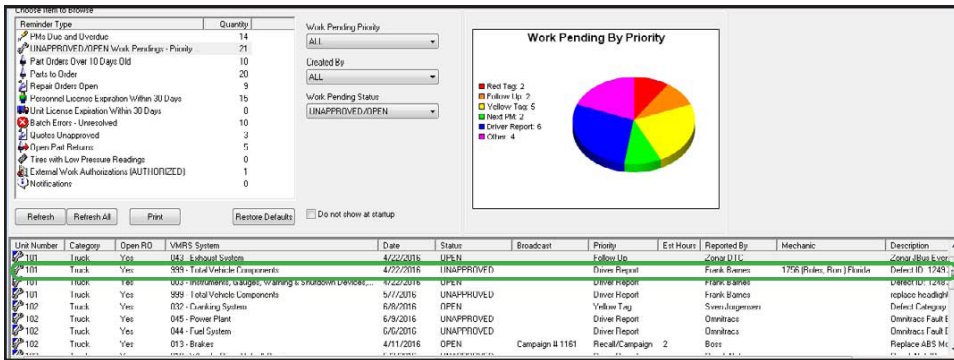

Zonar Electronic Verified Inspection Reporting (EVIR®) system ensures that required inspections are done correctly and the results are captured digitally. Dossier fleet maintenance software automates the control and administration of your fleet vehicles and assets.

Through this partnership, the two solutions optimize your maintenance workflows to make keeping your fleet compliant and maintaining vehicle health easier.

- Automatically create work pending items from defects found during an EVIR inspection.
- Auto-create work pending items based on the vehicle's ECM DTC data.
- Enable proactive preventative maintenance to reduce downtime and repair costs.
- Access advanced, customizable reporting with decision support tools.

Key features

- Predictive scheduling & maintenance
- Optimized asset selection & specification
- Better safety & compliance
- Fewer parts costs
- Reduced excess & obsolete inventory
- Longer vehicle life
- Higher mechanic productivity

Reduce downtime and costs.

Any failure or defect found during a Zonar EVIR inspection automatically creates a work pending item in the Dossier system. This drives the repair workflow, including a repair confirmation that's issued back to your Zonar system when the work is complete so the vehicle can be put back on the road, sooner.

Dossier can also update meters and auto-create work pending items based on a vehicle's ECM data pulled from its Zonar telematics box. Work pending items based on ECM diagnostic codes speed repairs because your shop will have advance knowledge of the problem and can have the parts and technicians ready as soon as the vehicle is available.

This close integration of inspection and repair workflows supports compliance, saves time and labor, and speeds the process of getting the vehicle fixed and back in service.

About Dossier powered by AMCS

Dossier powered by AMCS is an intuitive fleet maintenance management solution for fleets of all sizes. Founded in 1979 by experienced fleet managers and executives, Dossier has earned a national reputation as one of the most trusted names in the industry by demonstrating a friendly "whatever it takes, whatever you need" attitude.

About Zonar

Founded in 2001, Zonar has pioneered smart fleet management solutions throughout vocational, pupil, mass transit and commercial trucking industries. Headquartered in Seattle and part of the Continental family, Zonar's mission is to enhance the safety, performance and success of our customers by transforming the delivery of innovative insights for commercial fleets around the world.
