

ZONAR[®]

People Transportation Management

Be there when they need you.

Transport riders safely and reliably. Prioritize proactive fleet health. Digitize and streamline paper-based processes. And see your fleet's status in detail, day and night. All by using modern smart fleet solutions built to help you navigate today's challenges.

Riders notice when the bus is late. Staying on schedule is easier when you can see inside your fleet, day and night. Outfit your transit operation with modern, innovative smart fleet management solutions by an industry leader who understands your real-world challenges, big and small.

Optimize nearly every aspect of your operation with data-based decisions. Know where each vehicle is, where it's been, and how it's operating in real time—without contacting operators. Lower maintenance costs and enhance reliability by reducing vehicle downtime. Prevent violations by strengthening compliance with local, state and federal regulations, including the PTSAP Rule. And equip operators with modern tools to do their job efficiently and safely, even under challenging conditions.

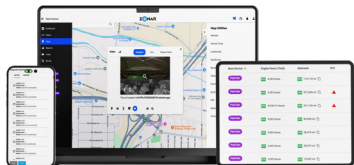

Round-the-clock support, on us.

If you need help, call our support professionals 24/7/365, including weekends and holidays. Email us for a response and resolution within 2 business days. And chat with us online for a solution within 4 hours.

No charge.

Outfit your fleet for greater efficiency.

Zonar Ignition™

Drive data-based decisions with detailed visibility. Monitor and manage your fleet online with this complete smart fleet management platform.

Operator tablets

Expand your fleet's capabilities and streamline daily tasks, including inspections. All with a library of Zonar and trusted third-party apps.

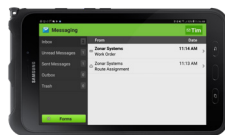

Zonar Coach™

Build a safer fleet with safer operators and drivers using a complete safety solution—or just our standalone dashcams. And protect your fleet from false claims with on-demand footage.

Zonar V4™ TCU

Track each vehicle's location, performance and health in real time. See where and when every start, stop, turn and idle event occurs, as it occurs.

Zonar Forms™

Support green initiatives and eliminate paper forms. Digitize tasks and two-way communications. Customize content and displays.

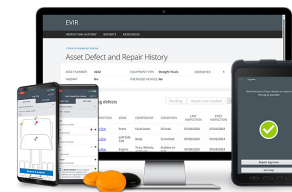

What would you like to track or monitor?

[Get pricing](#) | [Contact us](#)

Zonar LD™

Plug it into a light-duty vehicle's OBD II port, and track passenger and maintenance vehicles' location, usage, idling and speed. No effort, no downtime.

EVIR®

Electronically verify that every inspection and sanitization is performed properly. Integrate digital inspection results, repair and maintenance records. Available on tablets and smartphones.

Electronically verify every inspection.

Protect passengers with safer vehicles.

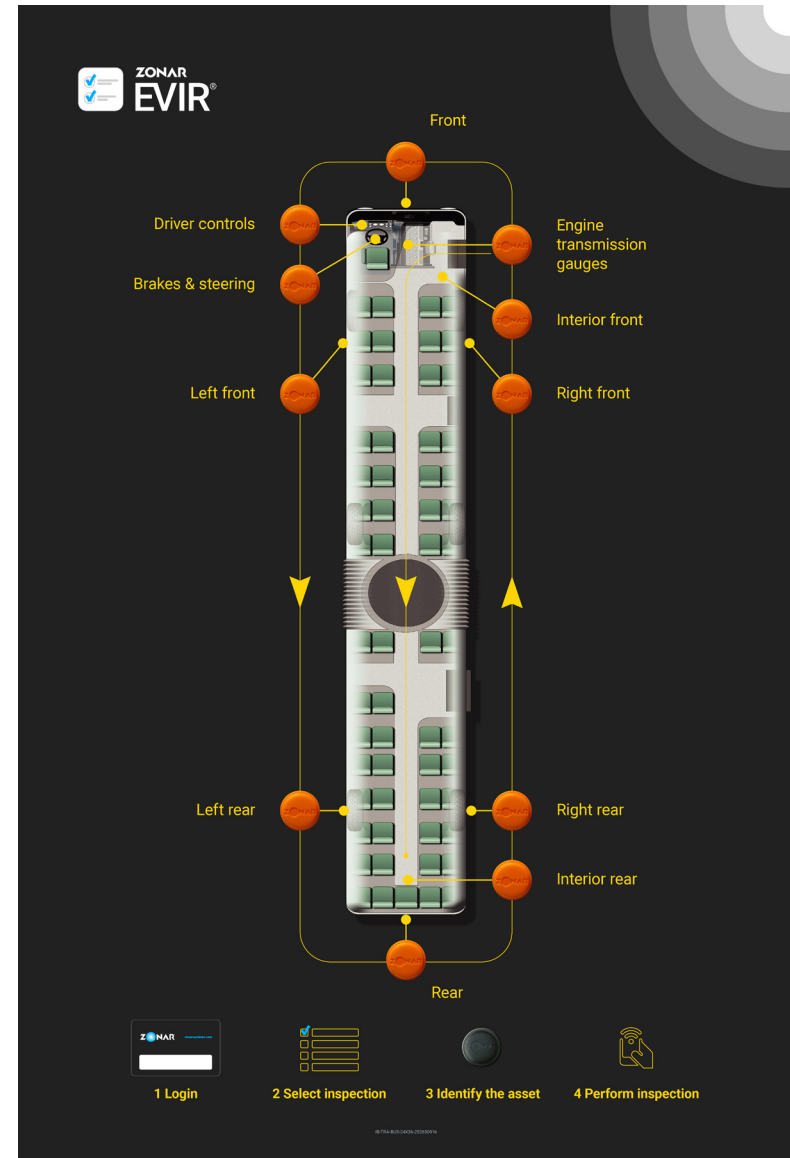

One pencil-whipped miss can cause a costly accident. Or leave your fleet vulnerable to lawsuits. Use our electronic verified inspection reporting (EVIR) system to make sure every pre-trip or relief shift inspection and sanitization is performed correctly, and the results are captured accurately—every time.

- Place a Zonar tag on each inspection zone of the transit vehicle.
- Drivers must physically scan each tag when they inspect that zone's components.
- As they perform the inspection, they mark defects, add notes and capture photos.
- When the inspection is complete, the results are uploaded to Zonar Ignition.
- Integration with popular maintenance platforms enables automatic work order generation for defects found during inspection.

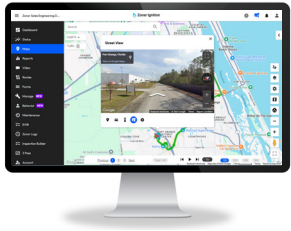

Drivers can use the downloadable EVIR app on their tablets and smartphones. Available on the Google Play Store and Apple App Store.

Cut inspection time by almost half.

Eliminate paperwork and streamline the process. Start to finish, EVIR reduces inspection time by up to 50 percent compared to paper-based inspections.

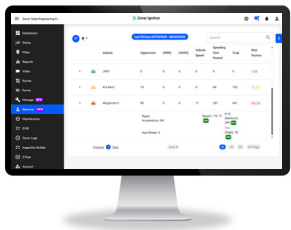

Keep your fleet healthy, ready and reliable.

Live Maps

Serve riders more reliably with detailed insight into your fleet's location and activity. Map every turn of the key, stop, start and other activity for each vehicle—in real time. Locate fixed route buses 24/7. And identify nearby paratransit vehicles ready for a late assignment.

Exception-based alerting

Know if an operator performs unsafely before you receive a complaint. Set alerts to immediately notify you when our on-board technology detects an operator disobeying posted speed signs and more.

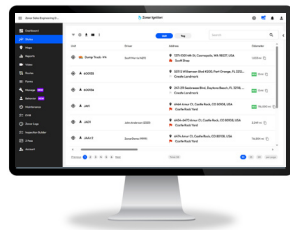

Then use the objective data to work with that operator and support fleet safety.

Geofenced zones

Assess on-time performance and delays. Define locations of interest. Set up preemptive alerts or filter reports, including early or late departures, or forbidden areas and roads.

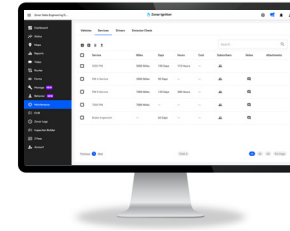

If needed, dive into more data to see what caused a delay and potential corrective steps.

Telematics health

Make sure each vehicle is collecting the data you need to run your fleet effectively.

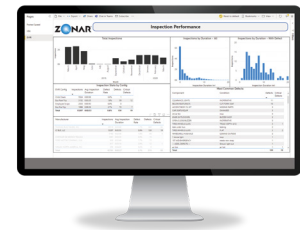

View all of your buses and paratransit vehicles, and their current connection status to our onboard telematics device to verify everything's running properly.

Alerts

Know if there's an issue sooner instead of later. Set up alerts for specific events, problems and vehicle defects. Then, work with operators and maintenance personnel to fix the problem.

Have alerts sent to your phone, and stay on top of your fleet without being tied to a laptop.

Custom reports

You know what types of actionable insights you need to best manage your fleet and stay on top of issues.

If our range of available reports doesn't capture the data you need, work with our in-house team of technical experts to build reports specifically for your fleet.

Answer complaints accurately.

"I get complaints that the vehicle did not arrive at the address, and I can see that it did. I can look at the path and see that the vehicle was, in fact, sitting there for seven minutes."

Eduardo Sobalvarro | Assistant General Manager | GoDurham ACCESS

Stay on top of each tire.

Integration between ContiConnect Live and Zonar solutions provides real-time data for every tire on each Zonar-enabled vehicle. Even when that vehicle is traveling.

- Receive multiple levels of low tire pressure alerts to prioritize service and avoid potential issues.
- Detect rapid changes in tire pressure, such as air leaks, to avoid breakdowns.
- Identify high tire temperatures that may lead to excessive wear and faster failure.

You need it? Let's build it.

Today's fleets are sophisticated. If you need additional insights specifically for your fleet, let's put our heads together to extend our platform and optimize your operations. Work with our in-house professional services experts to develop custom reports, real-time data streams and customized projects.

Our standardized delivery process eliminates roadblocks and delays, so your custom services are up and running as quickly as possible.

About Zonar

Zonar exists because you deserve better. Student transportation fleets trust us to protect our nation's children every day. Now, we're the trusted leader and clear choice for small to mid-sized businesses, enterprise fleets, and public sector organizations across the Americas. To some, you're one of a million. To us, you're the one in a million. Our proven fleet management solutions help you run better, safer and more efficiently. We help you save more of everything. We work late, push harder and deliver what's needed, faster—for you.

You might not get fired for choosing someone bigger or shinier. But when there's a surprise, you'll want the one who picks up and shows up to help. You call? We answer, 24/7. Whatever size, mix or industry your fleet is, we move at your speed to help solve real-world problems.

Zonar HQ: Seattle, WA. Other locations: Cincinnati, OH, West Chicago, IL & Lakeland, FL. Top priority: You.
